The opinions expressed herein are those of Aristotle Atlantic Partners, LLC (Aristotle Atlantic) and are subject to change without notice. Past performance is not a guarantee or indicator of future results. This material is not financial advice or an offer to purchase or sell any product. You should not assume that any of the securities transactions, sectors or holdings discussed in this report were or will be profitable, or that recommendations Aristotle Atlantic makes in the future will be profitable or equal the performance of the securities listed in this report. The portfolio characteristics shown relate to the Aristotle Atlantic Large Cap Growth strategy. Not every client's account will have these characteristics. Aristotle Atlantic reserves the right to modify its current investment strategies and techniques based on changing market dynamics or client needs. There is no assurance that any securities discussed herein will remain in an account's portfolio at the time you receive this report or that securities sold have not been repurchased. The securities discussed may not represent an account's entire portfolio and, in the aggregate, may represent only a small percentage of an account's portfolio holdings. The performance attribution presented is of a representative account from Aristotle Atlantic's Large Cap Growth Composite. The representative account is a discretionary client account which was chosen to most closely reflect the investment style of the strategy. The criteria used for representative account selection is based on the account's period of time under management and its similarity of holdings in relation to the strategy. Recommendations made in the last 12 months are available upon request.

Returns are presented gross and net of investment advisory fees and include the reinvestment of all income. Gross returns will be reduced by fees and other expenses that may be incurred in the management of the account. For example, a 0.5% annual fee deducted quarterly (0.125%) from an account with a ten-year annualized growth rate of 5.0% will produce a net result of 4.4%. Actual performance results will vary from this example.

The Russell 1000® Growth Index measures the performance of the large cap growth segment of the U.S. equity universe. It includes those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. This index has been selected as the benchmark and is used for comparison purposes only. The Russell 1000® Value Index measures the performance of the large cap value segment of the U.S. equity universe. It includes those Russell 1000 companies with lower price-to-book ratios and lower expected growth values. The S&P 500® Index is the Standard & Poor's Composite Index of 500 stocks and is a widely recognized, unmanaged index of common stock prices. The Russell 2000® Index measures the performance of the small cap segment of the U.S. equity universe. The Russell 2000 Index is a subset of the Russell 3000® Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2,000 of the smallest securities based on a combination of their market cap and current index membership. The Dow Jones Industrial Average® is a price-weighted measure of 30 U.S. blue-chip companies. The Index covers all industries except transportation and utilities. The NASDAQ Composite Index measures all NASDAQ domestic and international based common type stocks listed on The NASDAQ Stock Market. The NASDAQ Composite includes over 3,000 companies, more than most other stock market indices. The Bloomberg Barclays U.S. Aggregate Bond Index is an unmanaged index of domestic investment grade bonds, including corporate, government and mortgage-backed securities. The WTI Crude Oil Index is a major trading classification of sweet light crude oil that serves as a major benchmark price for oil consumed in the United States. The 3-Month U.S. Treasury Bill is a short-term debt obligation backed by the U.S. Treasury Department with a maturity of three months. While stock selection is not governed by quantitative rules, a stock typically is added only if the company has an excellent reputation, demonstrates sustained growth and is of interest to a large number of investors. The volatility (beta) of the Composite may be greater or less than its respective benchmarks. It is not possible to invest directly in these indices.
